EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeremy J. Curcuri (*Reg. No. 42,454*) on 1/19/2007. Examiner suggested amendments to the claims that would clarify the independent claims and set the claims apart from the prior art. Examiner suggested indicating that the data channels are for a single tape medium, as shown in Fig. 2, element 222. Applicant concurred and agreed to the changes by Examiner amendment.

The application has been amended as follows:

- In claim 1, line 6, insert the terms -for a single tape medium- after the terms "active data channels".
- In claim 1, line 8, insert the terms -for the said single tape medium- after the terms "tape drive throughput".
- In claim 12, line 7, insert the terms -for a single tape medium- after the terms "data channels".
- In claim 12, line 9, insert the terms -for the said single tape medium- after the terms "drive throughput".

Allowable Subject Matter

2. Claims 1-22 are allowed.

Art Unit: 2182

The following is the statement of reasons for the indication of allowable subject matter:

The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, **all** the limitations of the independent claim(s) (*claims 1 and 12*), particularly selecting a number of active data channels for a single tape medium in a high speed tape drive, wherein the number of active data channels is selected to match tape drive throughput for the single tape medium to the maximum throughput capability of a network interface. The determining and selecting means and steps in the independent claims are performed by hardware as disclosed in the specification (*page 12, line 25-page 13, line 3 data stored on a storage medium that used by the R/W head, Fig. 2*).

The prior art to Idleman discloses tape arrays where each tape unit in the tape array has a channel. Idleman cannot adjust the active heads per tape unit.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan S. Chen whose telephone number is 571-272-4143. The examiner can normally be reached on M-F 8:30am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim N. Huynh can be reached on (571) 272-4147. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
